

The LorryGuard is a powerful, battery-operated security fog machine for installation in craftsman vehicles, security vans, campers, yachts, containers or construction machines.

The unique vaporizer technology heats up within two seconds und produce dense white fog, while the power consumption in standby-mode is very low.

Up to 3 month standby-time without charging
(used with LorryGuard batterypack)

The compact size light weight (1.5 kg) makes the LorryGuard versatile, allowing for installation in many different places.

Various in- and ouputs can by used for connecting the LorryGuard to an alarm system, or use it as a standalone machine.

The fluid cartridge is filled with 55ml of high concentrated fog fluid, which produces very dense harmless fog. The cartridge can be easily mounted into the machine and is large enough for 2,5 minutes fog production.

The LorryGuard can be connected to a computer to adjust all parameters and read out the internal logbook.

As accessories are available a fluidsensor, a remote control and a modern lithium-ion Battery.

The LorryGuard is available with a horizontal adjusted output nozzle
or with a vertical adjusted output nozzle.

product type	vaporizing fog machine
power	720 Watt
voltage	12 V DC (battery operated)
heat up time	< 2 seconds
standby-time	3 month (with 6300mAh battery)
fluid consumption	20 ml/min
fluid tank capacity	55 ml
control	ignition activate Trigger 1 (low active) Trigger 2 (high active)
outputs	status LED error external equipment
bus interface	I ² C (fluidsensor, LiIon battery)
programming	with pc over USB
fog time	programmable
pause time	programmable
logbook	64 temporary entries 64 permanent entries
size (L x W x H)	228 x 175 x 68.2 mm
weight	1400 g
