

# LorryGuard XL

## SECURITY FOG MACHINE

The LorryGuard XL is a powerful, battery-operated security fog machine for installation in lorries.

The unique vaporizer technology heats up within two seconds und produce dense white fog, while the power consumption in standby-mode is very low.

**Up to 4 weeks standby-time without charging**  
(used with LorryGuard XL batterypack)

The compact size light weight (6.5 kg) makes the LorryGuard XL versatile, allowing for installation in many different places.

Various in- and ouputs can by used for connecting the LorryGuard XL to an alarm system, or use it as a standalone machine.

The fluid cartridge is filled with 600ml of high concentrated fog fluid, which produces very dense harmless fog. The cartridge can be easily mounted into the machine and is large enough for 6 minutes fog production.

The LorryGuard XL can be connected to a computer to adjust all parameters and read out the internal logbook.

The LorryGuard XL has a adjustable nozzle between 0° and 60°

As accessory is a batterypack available. which can be mounted direct beside the machine.
